SEND Charlie Flow chart on PFOA

J. Sed - do you really expect this type of compound
to express its carcinogenicity through genotoxicity
- Frankos \Rightarrow no carcinogenicity is probably a secondary
effect.

J. S. was intrigued by actual real food migration studies

J. S. - comment on Leydig cell tumors and their relationship
to humans \Rightarrow inhibition of testosterone synthesis

Jim Aidala - assoc. asst. admin of
Pesticides + Toxics Program

Oscar opening remarks

overview of FDA submissions and connection to
discussion of EFOSE carcinogenicity
explanation of safety assessment covering 5

State of Minnesota v. 3M Co.,
Court File No. 27-CV-10-28862

5/8/2008

Sussman meeting with Jim Aidala

Sussman met with J.A. at his office in Tatham + Stokes. Aidala had just been made aware of this last week. Concerned over staffs slowness in response to this issue. Very sensitive to use of 4(f) - he agrees that this appears to meet the ~~pr~~ requirements of 4(f). Staff appears to not believe there is eminent ~~danger~~ danger to public health. FIFRA is engaged in this issue.

↓
Suzy Hazen - Deputy Director of Pesticides will be at 3M meeting.

J.A. explained that data from 3M is opening EPA's eyes to similar concerns about other chemistries, other manufacturers, other processors.

Mike McCabe - Deputy EPA administrator
↳ is informed on PFOS issue
